## Presidents Perspective:

position at our August board meeting. Katie has worked for an air conditioning contractor in the past and has experience with the association when she assisted in the organizing the last NFACCA trade show. She has been very proactive thus far and brings a good new energy to the association.

Mark your Calendars! September 20th's general meeting will feature Sandra Rentfrow with the Department of Business and Professional Regulation. The main topic of this meeting will be the pursuit of unlicensed contractors. The movement to put a stop to this illegal activity has reached the state level and our parent organization, FRACCA, is on board pushing law officials to go after people who are participating in unlicensed and uninsured activity. I look forward to seeing all of you at the meeting.

Thank You,

Glenn Jones

NFACCA President

I hope the heat of the summer has helped our members keep their trucks rolling during these tough economic times.

I am very happy to announce that we have a new Executive Director. Katie Ade officially took the

Hello! It is great to be a part of such a wonderful association!

I would like to start off by saying that I am here for all of you! If there is any information that I can help with please let me

know! I will help out however I can!

We are currently in the middle of switching everything over so a few things are not finished yet. We are still switching the phones over so the best way to get in touch with me is through e-mail. Just shoot me

an e-mail at [mail@nfacca.com](mailto:mail@nfacca.com) and I will get back as soon as I can. Also if everyone can e-mail their RSVP's it would be a great help!

I look forward to helping, updating and planning. Together we can make this association grow! I look forward to meeting everyone and Thank You!

### Honeywell Thermostat Recall

In cooperation with the U.S. Consumer Product Safety Commission and the Electrical Safety Authority (ESA) in Canada, Honeywell announced the voluntary recall of certain electric baseboard and fan heater thermostats (model numbers T4700, CT1950 and CT1957) sold from 2000 to 2007 under the Honeywell and Cadet brand names. The thermostat contains a relay used to turn on the electric baseboard or fan heater that may not function properly, causing the thermostat to overheat.

Honeywell has sold over 77,000 T4700, CT1950 and CT1957 electric baseboard and fan heater thermostats in the U.S. and about 240,000 in Canada. Honeywell received 16 reports of thermostats melting. There have been no reports of injuries.

Distributors, Contractors and Consumers who have sold, installed or are still using one of these should contact a Honeywell Customer Care representative at 888-235-7363 or visit [www.yourhome.honeywell.com/T4700](http://www.yourhome.honeywell.com/T4700) for additional instructions on how to receive free replacement products.
